KALDEWEI

KALDEWEI STEEL ENAMEL
3.5MM WITH 30 YEARS
GUARANTEE

EASY INSTALLATION - UNSURPASSED STABILITY

Due to the kaldewei's 3.5mm material thickness through the product (from the rim to the waste outlet) the steel enamel is extremely difficult to damage due to little integral movement within the 3.5mm steel enamel.

This in turn leads to an easy and more popular installation for the installer as no additional procedures are necessary such as protective frames, supports or stabilisation slats, etc

GUARANTEE - LONGEVITY AND SAFETY

30 year guarantee on all kaldewei baths and showertrays made from 3.5mm steel enamel. With proper care, (wiping dry for prevention against lime-scale build up) a kaldewei 3.5mm bath or showertray still looks almost the same decades after it was first used.

SUSTAINABILITY (OUR ECOLOGICAL RESPONSIBILITY)

Kaldewei steel enamel 3.5mm is certified for sustainable and eco friendly building in accordance with iso 14025. Resource usage, energy requirements and emissions are rated over the entire manufacturing and recycling process. In comparison to acrylic baths, kaldewei 3.5mm steel enamel displayed an exemplary eco-audit.

SCRATCH AND IMPACT RESISTANT.

KALDEWEI steel enamel is much harder than acrylic and highly resistant to mechanical stress.

HEAT RESISTANT

Burning and smouldering objects such as cigarettes or candles do not leave marks on the surface.

HYGIENIC AND EASY TO CLEAN

Without even the tiniest scratches, bacteria have nowhere to settle. Simply wipe with a damp cloth.

COLOUR FAST AND UV LIGHT RESISTANT.

Lightfast, resistant to UV light and does not fade. KALDEWEI steel enamel ensures that shower surfaces look as good as new even after 30 years.

ACID AND CHEMICAL RESISTANT

Perfume, bath additives or common household detergents will not harm the KALDEWEI steel enamel.

DIMENSIONALLY STABLE

KALDEWEI baths and shower surfaces hardly expand at all in temperature fluctuations, thereby reducing the risk of cracked joints or structural damage through moisture penetration.
