Electric Underfloor Heating Features

There are many features in our electric underfloor heating range. Use the icons to help choose the right option for you.

Touch Controls
Multi function touchscreen providing effortless control at your fingertips.

Customise Display
Personalise with photo backgrounds, the only underfloor heating thermostat with this ability.

Colour Display
Clear graphical display makes any adjustment quick and easy. Choose the display style that suits you best – wide choice of screen themes.

Mono Display
Easy-to-use interface and intuitive design enables end users to choose the time as easily as they would with a watch or clock and quickly set their programs.

WiFi Control
Allows you to link your thermostat with your home's existing Smart technologies such as the Amazon Echo or Google Home.

App Control
SmartGeo is a unique technology developed by Warmup and built into the MyHeating App that uses an advanced algorithm to understand the most efficient heat settings for your home.

Compatible with Smart Devices
Monitor your energy + cost graphs on mobile, tablet and desktop.

IP20 Rated
The thermostat is touchproof and will be resistant to dust or objects that are over 12mm in size. However, it has no protection whatsoever against water.

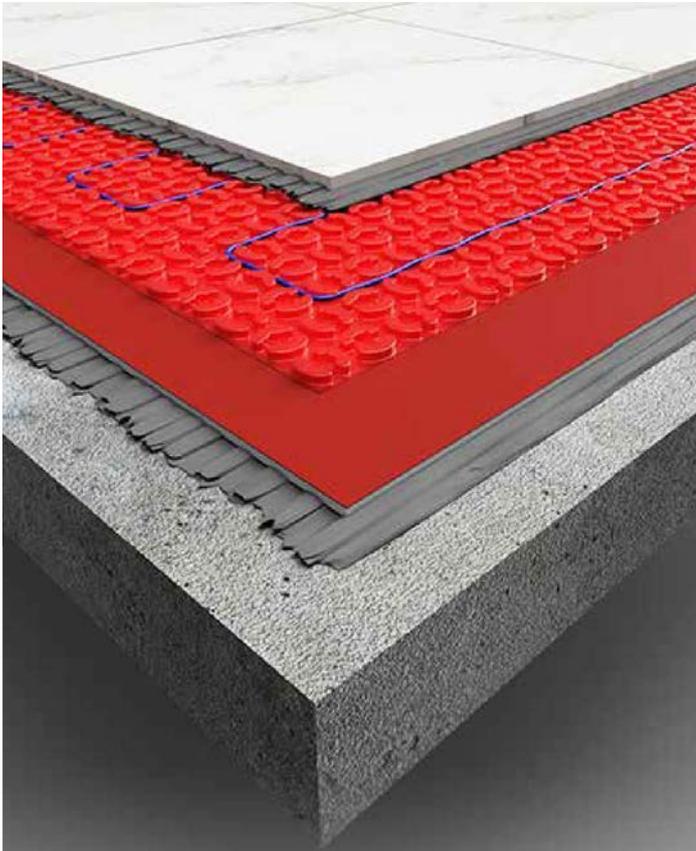

IP33 Rated
The thermostat is protected from tools and wires greater than 2.5mm. Protected from water spray less than 60 degrees from vertical.

DCM-PRO™

Take a closer look at the DCM-PRO™ features video, scan to find out more

DCM-PRO™ – Heated Decoupling System

Warmup DCM-PRO™ is an electric underfloor heating system that provides anti-fracture protection to tiled floor finishes. There are two alternative decoupling membranes within the range; one is backed with a standard non-woven fleece, the other a peel and stick adhesive, which provides the fastest solution for installing electric underfloor heating.

The patented membranes provide a versatile solution for any heated floor, with the peel and stick version being ideal for rapid installation over Warmup™ insulation or smooth subfloors, while the fleece backed version is better suited to coarse and/or damp surfaces.

● Anti-Fracture Protection

DCM-PRO™ Peel and Stick uses a viscous adhesive that absorbs the strain created as the subfloor grows and shrinks with the seasons, protecting the floor finish from excessive stress that would otherwise cause cracks. DCM-PRO™ Fleece uses a traditional decoupling fleece layer, perfect for use with levellers or for installation on damp or coarse subfloors.

● For a Variety of Floor Finishes

Designed for use under tile and stone floor, the DCM-PRO™ can also be installed under other flooring types including vinyl, carpet and timber by adding a 10 mm layer of levelling compound to the membrane first.

● Fastest to Install

DCM-PRO™ Peel and Stick with its self-adhesive underside can be affixed directly to the subfloor, eliminating the need to use tile adhesive below, significantly reducing installation time.

Protects Floor from Damage

Rated as high performance, DCM-PRO is proven to protect tiled floors from cracking (ANSI 118.12.5.4).

The self-healing decoupling layer contracts and expands to ideal with seasonal changes, preventing damage occurring from gaps and cracks in the subfloor. (Patent No. GB2548319B).

Protects floor surface from damage caused by subfloor movement.

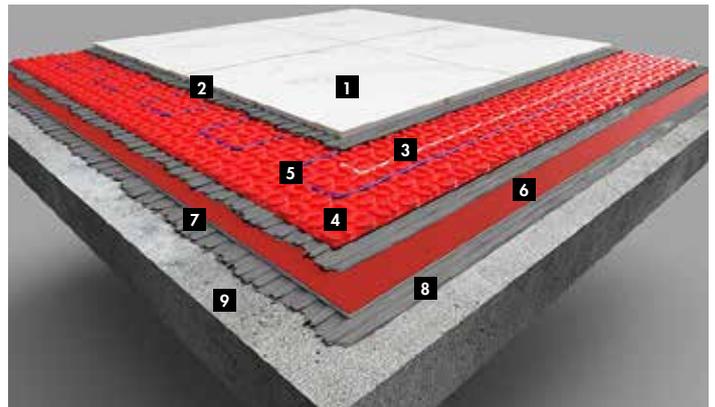

Patented adhesive layer slides and stretches with expansion.

Adhesive layer contracts and self-heals if gap shrinks due to seasonal changes (typical for wood subfloors).

Typical Floor Build-Up

- 1 Floor Finish
- 2 Flexible Adhesive
- 3 Floor Sensor
- 4 Decoupling Membrane (with adhesive backing)
- 5 Heating Cable
- 6 Warmup Ultralight™ (optional)
- 7 Flexible Tile Adhesive (optional)
- 8 Warmup Primer
- 9 Pre-insulated Subfloor (with a surface regularity of SR1*)

*If installing the optional Warmup Ultralight™, refer to its installation manual for its sub floor requirements

DCM-PRO™ Mat V3 – Specification

Product Code	DCM-PS DCM-F-# (Fleece)
Colour	Red
Dimensions	DCM-#-0.73 – 0.73m ² Sheet (985mm x 741mm) DCM-#-14 – 14m ² Roll (985mm x 14.3m)
Composition	Polypropylene mat with peel and stick or fleece backing

Materials

DCM-PRO™

DCM-PRO™ Cables – Specification

Product Code	DCM-C-#
Connection	3m long coldtail Flat 2 core cable with earth braid
Operating Voltage	230 V AC: 50 Hz
Output Rating	(3 castellations – 90 mm) DCM-C: 150 W/m ²
Heating Cores	Dual core, multi-strand heating element
ASTM C627	Light Commercial Use
Cable Sheath	Blue
IP Rating	X7
Inner / Outer Insulation	ETFE / PVC
Earth Protection	Metal braiding surrounding heating cores
Min. Install Temp.	-10 °C
Spacing	60 mm / 90 mm / 120mm

Convenient Sizing

The standard cable spacing is 3 castellations (90mm), but the system is designed to have the cable spacing adjusted to match both power and area requirements:

DCM-PRO™ 225 W/m² – based on 2 castellations

DCM-PRO™ 150 W/m² – based on 3 castellations (standard)

DCM-PRO™ 112.5 W/m² – based on 4 castellations

Heated area at different spacings, m²

	Castellations

DCM-R-E	External Corner	120mm	60mm	120mm	1mm

F&Qs

Q – Can the DCM-PRO™ system reduce the risk of my tiled floor developing cracks?

A – As a decoupling system, the DCM-PRO™ has been designed to absorb the normal lateral movement which occurs when the subfloor and finished floor expand and contract at different rates. This has been backed up with a 'High Performance' rating for crack isolation, as externally tested according to ANSI 118.12.5.4 (American National Standards Institute, www.ansi.org).

Q – How does the DCM-PRO™ cable fit into the DCM-PRO™ mat?

A – The DCM-PRO™ cable clips into the castellations of the DCM-PRO™ mat. No tools are required when installing the cable into the mat. It is easily installed by running your foot or thumb along the top of the cable to guide it into the castellations.

Q – How quickly can I lay a floor finish onto the DCM-PRO™?

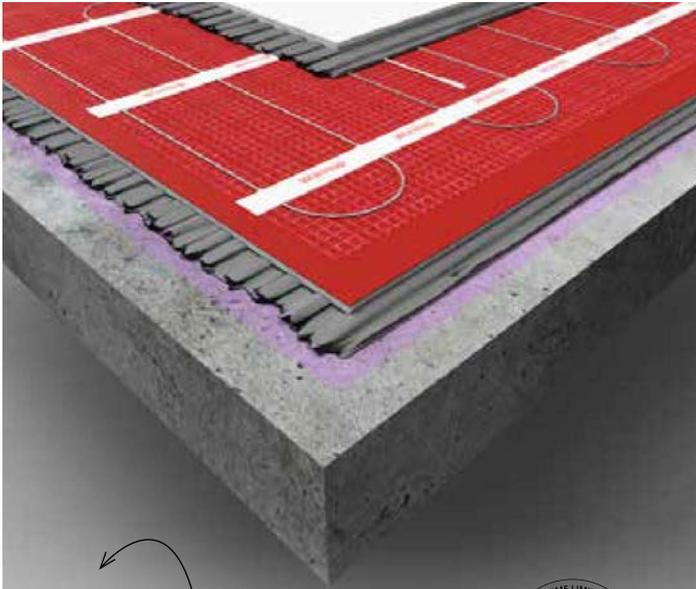

A – Straight away. One of the main advantages of the self-adhesive properties of the DCM-PRO™ is no waiting time. As soon as the mat is fitted, cable installed and cable resistance checked, tiling or self-levelling can be started.

Q – Can the DCM-PRO™ system be used in a wet room?

A – Yes. With the addition of the DCM-PRO™ waterproofing tape installed following the manual, the system is waterproof and can be used in a full wet room environment.

Materials

StickyMat™

Take a closer look at the StickyMat™ installation video, scan to find out more

StickyMat™ – Heated Mat System

The Warmup StickyMat™ System is designed for use within the adhesive layer under tiles or within a levelling compound under other floor finishes. The fixed spacing and self-adhesive mat makes installation of regularly shaped rooms quick and easy whilst ensuring precision is maintained.

The pressure sensitive adhesive securely binds the mats to the floor, keeping them flat and ensuring the application of tile adhesive is snag free whilst allowing the mats to be easily repositioned as needed.

✔ Quick + Easy Installation

Sturdy glass fibre mesh with pressure sensitive adhesive, for the fastest and most secure installation of electric underfloor heating

✔ No Increase In Floor Levels

With an ultra-thin, dual fluoropolymer coated heating wire

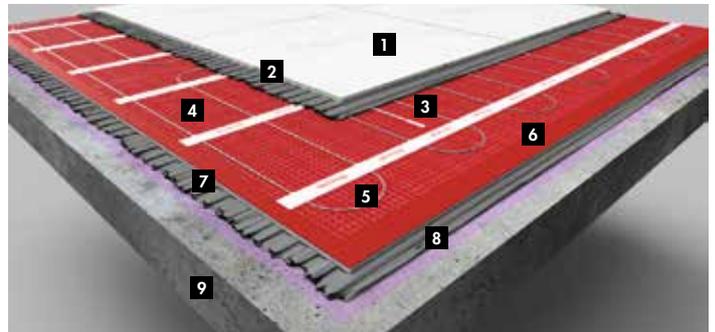

✔ Suitable For All Builds

StickyMat™ underfloor heating system is suitable for all building projects; retrofits, new builds and refurbishments

StickyMat™ – Specification

Product Code	SPM / 2SPM
Connection	3m long coldtail, Flat 2 core cable with earth braid
Operating Voltage	230 V AC: 50 Hz
Output Rating	150 W/m ² (SPM) / 200 W/m ² (2SPM)
Heating Cores	Dual core, multi-strand heating element
Thread Connections	BS EN ISO 228-1
IP Rating	X7
Cable Sheath	Translucent
Cable Spacing	80 mm (+/- 3mm)
Mesh	Sticky pressure sensitive fibreglass mesh
Inner / Outer Insulation	ETFE
Earth Protection	Metal braiding surrounding heating cores
Min. Install Temp	-10 °C

Typical Floor Build-Up

- 1 Floor Finish
- 2 Flexible Adhesive
- 3 Floor Sensor
- 4 Fibreglass Mesh (with pressure sensitive adhesive)
- 5 Heating Cable
- 6 Warmup Ultralight™ (optional)
- 7 Flexible Tile Adhesive (optional)
- 8 Warmup Primer
- 9 Pre-insulated Subfloor (with a surface regularity of SR1*)

Warmup Ultralight™

Take a closer look at the Ultralight™ features video, scan to find out more

Warmup Ultralight™

4in1 (Insulating, Heat Spreading, Decoupling, Sound Reducing)

Ultralight™ is a specialised composite board designed for floor heating applications. Manufactured as flat, flexible sheets they are water and mould-resistant. The top surface incorporates a heat spreading aluminium layer combined with non-woven fleece.

The core PEF insulation provides thermal separation from the floor beneath, ensuring a rapid thermal response of a heated layer of tiles or levelling compound above.

✔ **Improves Comfort and Reduces Running Costs**

The heat spreading aluminium layer improves comfort and reduces running costs by providing a 50 % more even heat spread. This enables the floor to achieve the same comfort temperature whilst using 12% less energy. See Fig 1

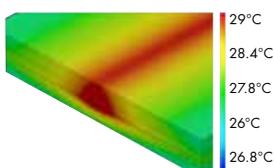

✔ **Reduces eUFH Heat Up Times**

30% faster heat up times than standard insulation boards

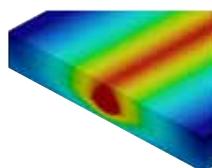

✔ **Protection Against Tiles Cracking**

Decoupling fleece layer provides high performance protection against tiles cracking due to lateral subfloor movement in accordance with ANSI A118.12 standard

Heat Spread

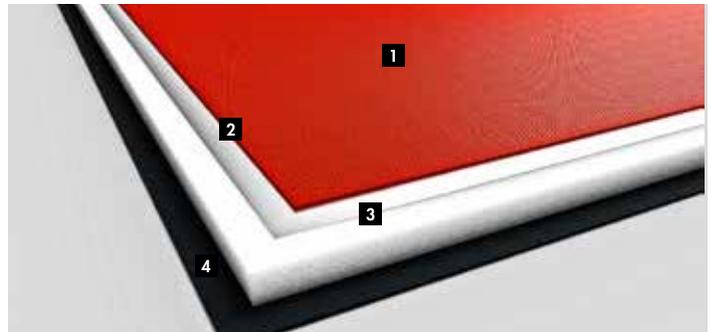

6 mm Ultralight™ Insulation – 29°C Surface Limit

6 mm Traditional Insulation – 26.8°C Surface Limit

Fig. 1 – Improved Heat Spread of Ultralight™ Vs Traditional Insulation
When operating at a 29°C maximum surface temperature, traditional insulation would result in a minimum surface temperature just below 26°C. By comparison, Ultralight™ increases this to 27.5°C resulting in increased comfort and a 10.5% increase in heat output.

Typical Floor Build-Up

- 1 Non-Woven Fleece
- 2 Heat Spreading Aluminium
- 3 220kPa Insulation
- 4 Decoupling Non-Woven Fleece

Warmup 7iE™ Smart Matter WiFi Thermostat

Warmup's 7iE™ Smart Matter WiFi Thermostat

World's first UFH controller with a Smartphone touchscreen.

The 7iE uses advanced technology to maximise on the efficiency of a Warmup heating system. With Matter compatibility and Smartcare support included, the 7iE effortlessly integrates your heating within your Smart home ecosystem - including Apple Home, Google Home, and Amazon Alexa.

● Provides Smarter Energy Savings

The 7iE™ Smart Matter WiFi Thermostat automatically adjusts your heating to maximise comfort and efficiency, with up to 25% energy saving

● Effortless Smart Home Integration

The 7iE™ Smart Matter WiFi Thermostat is compatible with Apple, Google and Amazon devices through its Matter technology

● Expert Heating Support

Includes expert heating support through its access to Smartcare, which provides proactive system monitoring and market-leading support for life

Hot Water Cylinders that work in harmony with your boiler

Combining quality, durability, and efficiency, the Instinct hot water cylinder range has been designed to work hand-in-hand with your boiler for excellent results. Available in sizes of up to 300 litres, Instinct's hot water cylinders can help keep your home comfortable all year round —whatever your central heating needs.

25 year vessel warranty

Less space required – no need for a water storage tank in the loft

Perfect for homes that have a high demand for hot water

Corrugated heating coil

Manufactured from duplex stainless steel

Manufactured in the UK

Instinct hot water cylinders – a high quality addition to your central heating system.
